

# NERI

Holiday destination located not far from French Riviera, Grasse is considered the perfume world capital thanks to an industry born in XVI century, based on the fine techniques to use and manage the local raw materials. Flowers' plantations are, indeed, located in a large part of the territory whose main characteristic is the quality of the elements such as jasmine and its particular delicate scent.

**Stazione climatica situata a breve distanza dalla Costa azzurra, Grasse è ritenuta la capitale mondiale del profumo grazie a un'industria che risale al XVI secolo, basata sulle raffinate tecniche di lavorazione delle materie prime locali. La coltivazione dei fiori occupa infatti buona parte del territorio e si contraddistingue per la qualità di elementi quali il gelsomino, dall'aroma particolarmente delicato.**

# Grasse

## Project

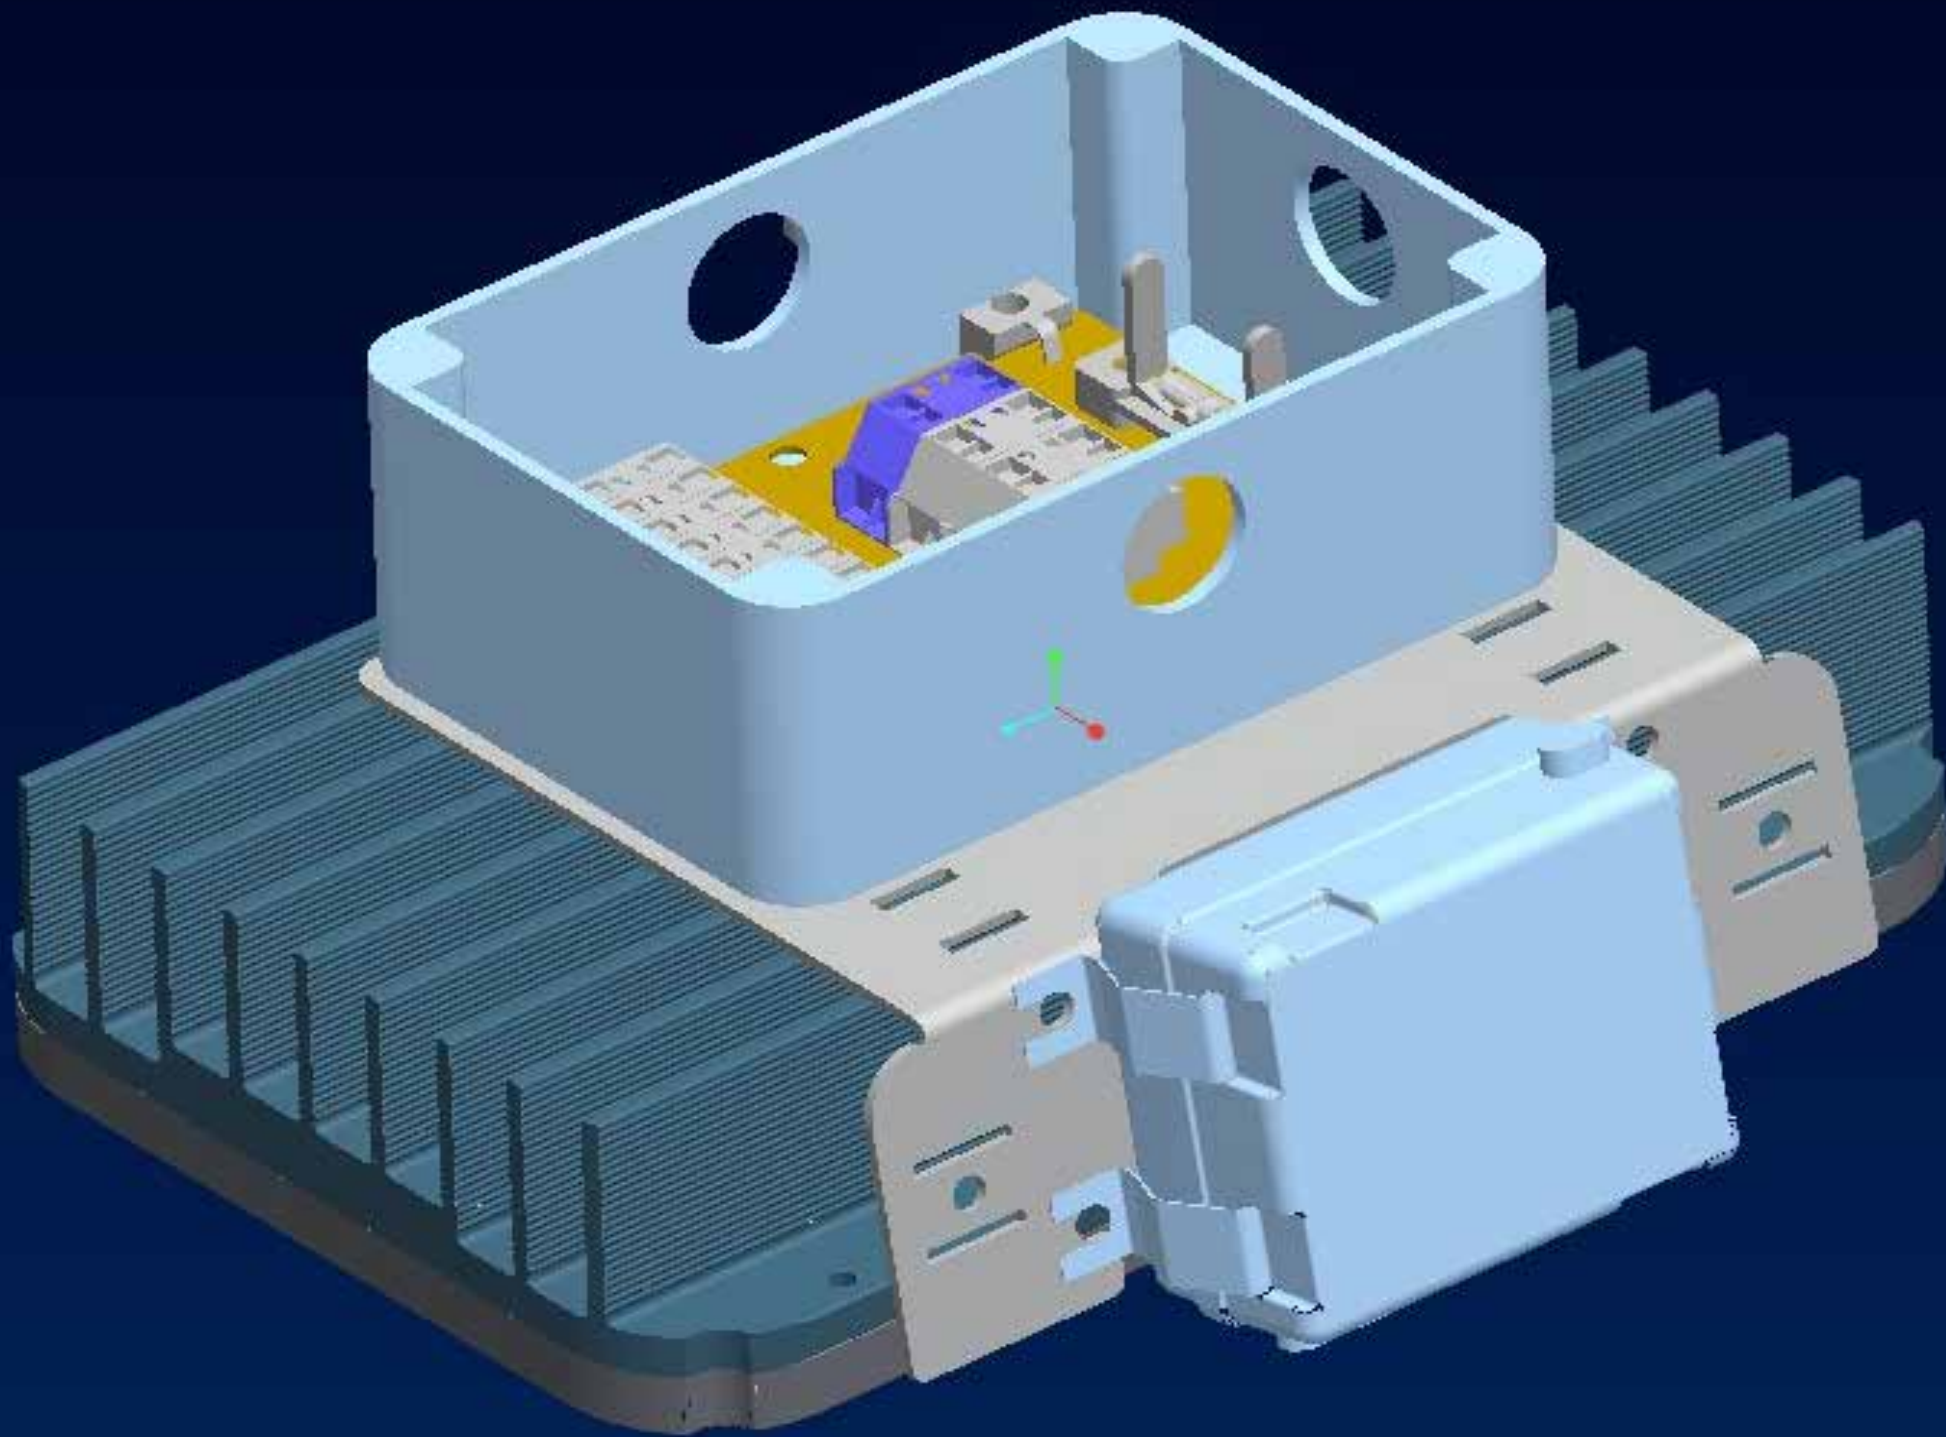

In Grasse there have been for years two types of hand-made lanterns, one in iron with a square shape and one in iron with hexagonal shape

Neri has provided for both a LED kit easy to be installed in the already existing fixtures. The original 400 lanterns modified in this way have changed the look of the city by night.

**A Grasse sono presenti da decenni due tipologie di lanterne artigianali, una in ferro quadrata e una in ferro esagonale**

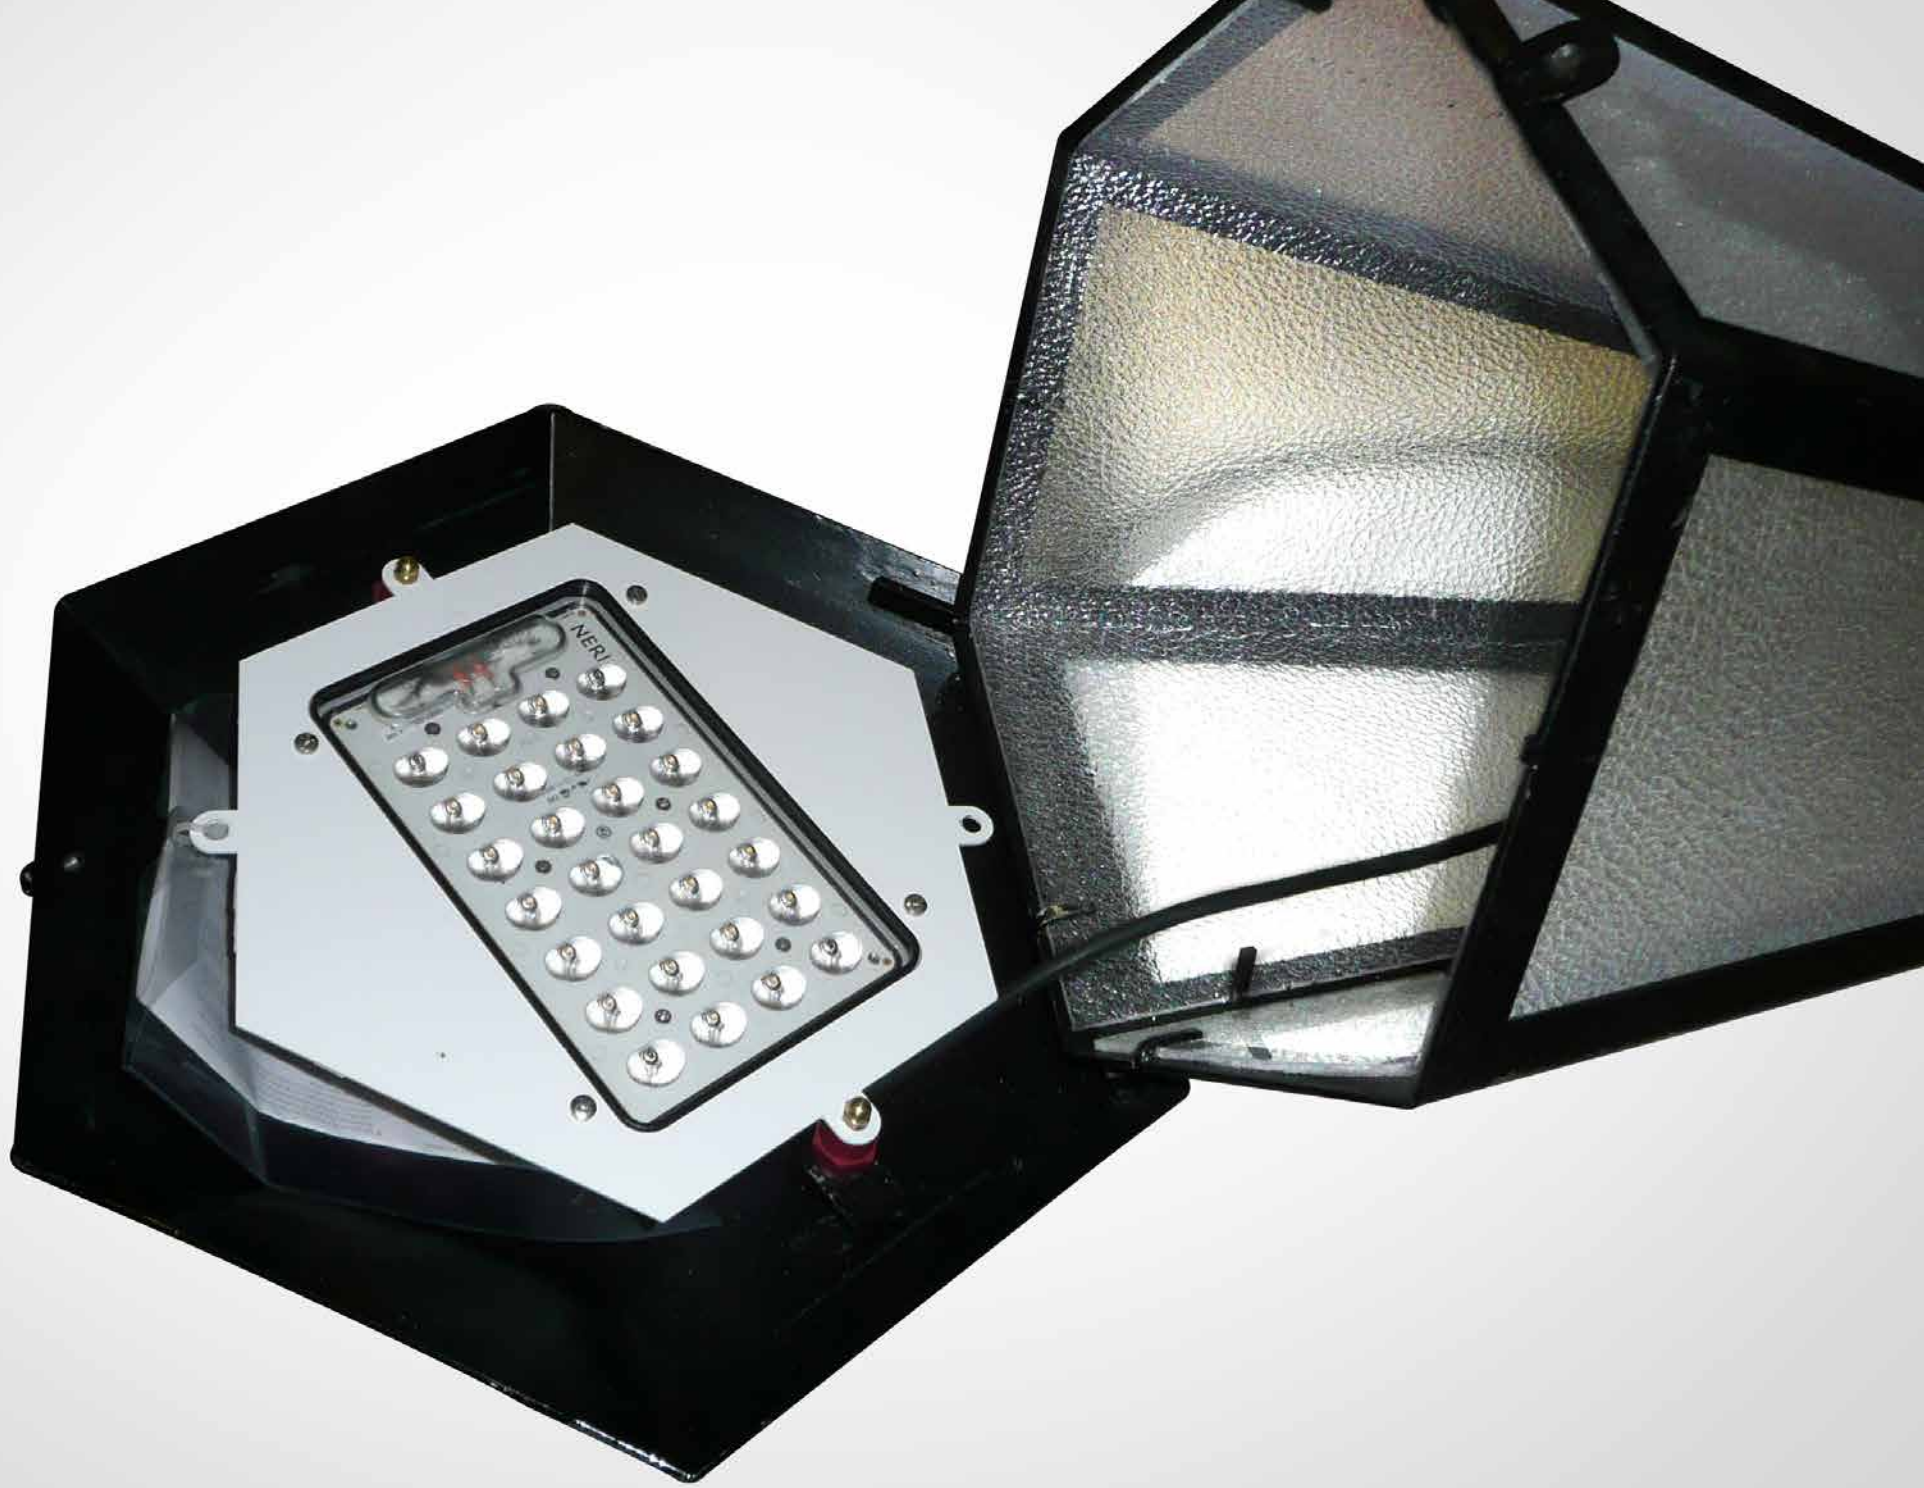

**Per entrambe Neri ha predisposto un kit LED facile da installare sulle lanterne già esistenti. Le 400 lanterne originali così modificate hanno cambiato il volto della città notturna.**
