

Saiph was designed by Alfredo Farnè. The system has a two-part aluminum base with specific slots designed to hold decorative lighting modules available in green, yellow or blue. The top is formed by two parallel arms angled downwards. The Saiph lighting system is completed by the Idesia street furniture collection.

Saiph è stato progettato dal designer Alfredo Farnè. Il sistema prevede una base in alluminio composta da due parti dotate di asole per moduli decorativi luminosi, di colore verde, giallo o blu. La cima è formata da due bracci paralleli rivolti verso il basso. Il sistema di illuminazione Saiph è completato dalla serie di arredo urbano Idesia.

Saiph system | Lighting

Saiph can be used in various situations with interesting high quality aesthetic results:

- Extra-urban roads with vehicle traffic
- Streets with vehicle traffic located inside city limits
- Some designers used Saiph successfully to furnish and light city squares
- Parks
- Car parks
- Roundabouts
- Harbours and seaside roads

Sono varie le situazioni in cui Saiph può essere utilizzato con risultati esteticamente e qualitativamente interessanti:

- Strade a percorrenza veicolare extra urbane
- Strade a percorrenza veicolare interne alle aree urbane
- Alcuni progettisti hanno impiegato Saiph con successo per arredare e illuminare piazze urbane
- Parchi
- Parcheggi
- Rotatorie
- Porti e lungomare

Roundabouts

When necessary, the luminaires have been positioned at different heights to provide the best light for both road and pavement. Saiph can be sold with or without the lit base.

Quando necessario sono state sfalsate le luci per ottenere un risultato illuminotecnico differenziato fra pedonale e stradale, a volte non è stata impiegata la base.
