

# NERI

COMPANY PROFILE

**“We share our culture and know-how with the architects, lighting designers and consultants we constantly collaborate with, to create unique architectural lighting and urban decor projects worldwide, that will stand the test of time.”**

**Company.** Since 1962, Neri has been a symbol of excellence in high-end outdoor furniture and lighting systems in Italy and worldwide. Neri is the lighting standard in over half of the Italian municipalities and many prestigious mixed-use, hospitality, residential, and retail developments worldwide. The Neri message has always been and continues to be about innovation and technological research, in keeping with eco-friendliness and human sustainability. In 2012, Neri North America was established to propagate and support these philosophies throughout the Americas.

**Products range.** Neri offers three product categories designed to improve and enhance our surroundings: lighting, site furnishings and building structures. Unique families of products are designed to speak the same aesthetic across all three categories allowing for a cohesive and harmonious site plan. Neri offers both the contemporary range, conceived with prestigious designers, as well as the heritage range derived from the experience and classical tradition of our town and city centres. In addition to the collection in our catalogues, company know-how and experience allow Neri to work with designers on product modifications, customized design services and restoration, reproduction and preservation of historical elements that have been enhancing our cities throughout the centuries.

**Research and development.** With over 200 patents and 25% of our employees in R&D and technologies, at Neri Research and Development means working with determination around preserving our history and culture while also innovating at the forefront of today's crucial design issues for lighting, product development and the sustainability of products. Neri developments include the first remote phosphor LED lighting fixtures for outdoor pedestrian lighting; patented internal tilting optics technology for roadway lighting and the development of the Neri Foundation and Museum with over 5000 catalogued items of early and historical cast-iron production from throughout the world. In one of Italy's only UL and ENEC certified lighting test facilities, the Neri Test Labs are designed for rapid deployment of standards approved solutions worldwide. With the ability to perform stress tests such as salt spray, UV-A, thermal and humidity as well as performance tests through our in-house goniophotometer and integrating sphere, our customers can be assured to receive only the highest quality products from materials, performance, efficiency and design.
